UT Dallas Audiology Program Ranks Third
By U. S. News & World Report

March 19, 2012

UT Dallas' audiology program rose to third place, in the latest U.S. News and World Report national ranking of graduate schools.

The list evaluates the quality of more than 1,200 U.S. graduate programs based on detailed statistical information and assessments by university administrators and faculty. The programs assessed in the annual poll focus on a wide range of disciplines, ranging from business to psychology.

Students in the School of Behavioral and Brain Sciences (BBS) communication sciences programs study and train primarily at the UT Dallas Callier Center for Communication Disorders.

Callier Center Executive Director Dr. Thomas Campbell attributes their continuing rise to highly motivated students and outstanding faculty. The reputation of our programs means we receive more applications than we can accept, so we’re able to choose the brightest, most-promising students. He said. “When students arrive at UT Dallas, they are able to learn from nationally renowned faculty members, who help them develop into the next generation of researchers and clinicians.”
