ViCTOR Aging Study

Are you looking to be part of an active program geared toward becoming more mentally fit and improving your memory?

Researchers in the Lifespan Neuroscience and Cognition laboratory are recruiting participants aged 65+ to participate in a cognitive training clinical research study. You will be reimbursed for your time and effort.

Requirements:

- Complete computer-based cognitive tasks, pencil-and-paper tests
- Learned English before age 5
- 65+ years old
- Currently not on medication for the treatment of mental illness
- No history of head injury, brain surgery, or major cardiovascular disease
- Complete computer-based cognitive training program at home
